

12.1 Geometric Representations (F.BF.1A)

Example 1:

- a) Observe the
- tower numbers*
- pattern below as a class.

- b) Express the pattern in a table. Find the number of dots for
- $n = 4,5$
- . Discuss how to find the 50
- th
- figure.

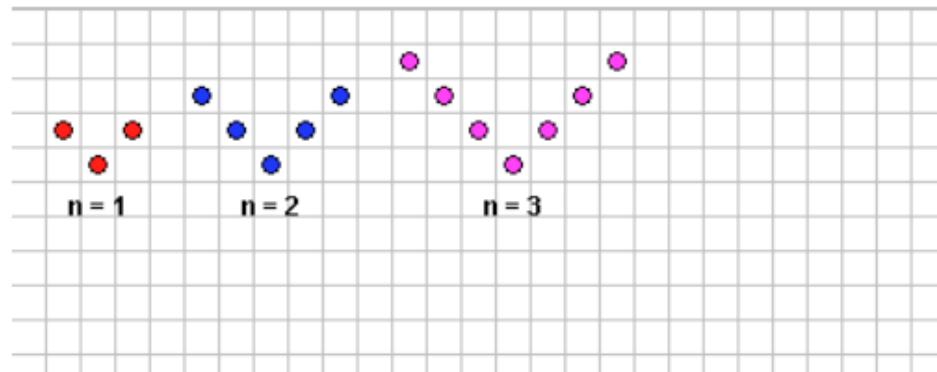

# position (input)	# of dots (output)
1	
2	
3	
4	
5	
50	

- c) Using the previous question, come up with a function rule.

Function Rule:

Example 2:

a)

c)

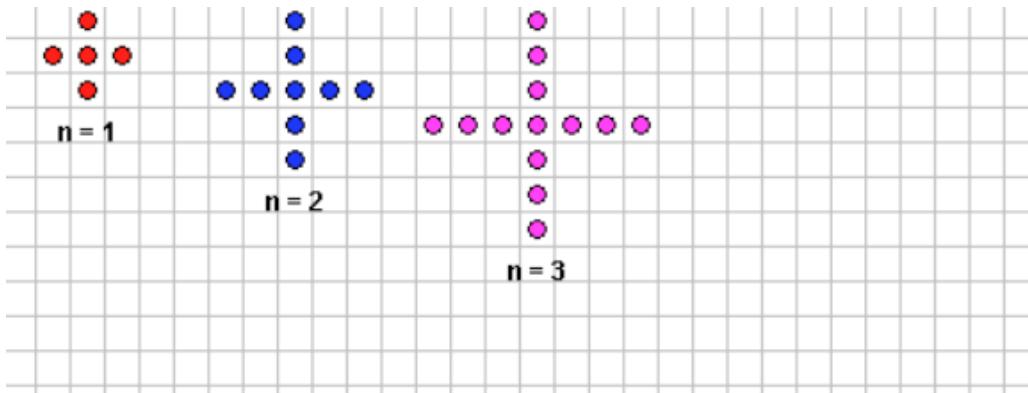

Function Rule:

b)

# position (input)	# of dots (output)
1	
2	
3	
4	
5	
20	

Example 3:

a)

b)

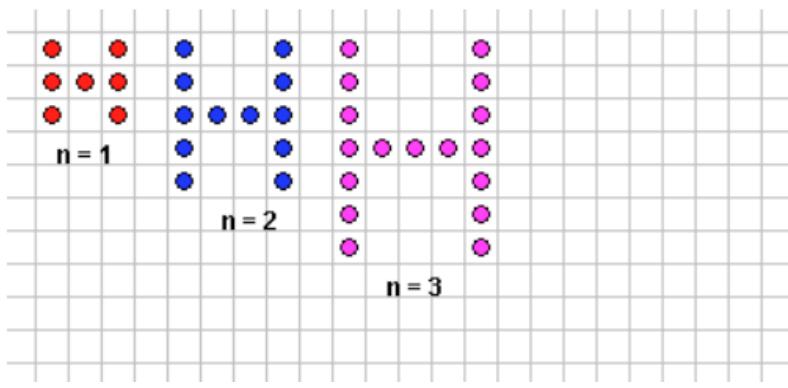

# position (input)	# of dots (output)
1	
2	
3	
4	
5	
20	

c)

Function Rule:

Example 4:

a)

b)

# position (input)	# of dots (output)
1	
2	
3	
4	
5	
20	

c)

Function Rule:
